

Amit Kumar

Cloud Devops Engineer

Highly motivated and results-oriented DevOps Specialist with 9.5 years in IT and 5.7 years specializing in DevOps, seeking a Cloud DevOps Engineer position. Proven ability to automate software delivery pipelines using Azure DevOps and Microsoft Azure, while ensuring efficiency, scalability, and security. Passionate about delivering reliable and innovative solutions that drive business success within the Computer Software/Engineering industry.

PROFESSIONAL SUMMARY

- Seasoned DevOps specialist with 9.5 years of IT experience, including 5.7 years dedicated to DevOps practices and cloud technologies.
- Expertise in designing, implementing, and managing CI/CD pipelines using Azure DevOps, AWS, and associated tools.
- Proficient in Infrastructure as Code (IaC) with Terraform, automating the provisioning of cloud resources across multiple environments.
- Strong skills in containerization and orchestration technologies such as Docker and Kubernetes.
- Proven ability to integrate security and compliance measures into CI/CD pipelines using tools like SonarQube, Checkov, and Trivy.
- Experienced in managing and monitoring cloud infrastructure, identifying and resolving performance bottlenecks.
- Successfully pioneered Infrastructure as Code (IaC) adoption with Terraform by establishing consistent infrastructure deployments and reducing manual configuration errors by 60%.
- Experienced in scripting and automation using Bash and YAML.
- Demonstrated ability to collaborate with cross-functional teams to support development, testing, and operations across varied cloud platforms.
- Possess strong understanding of project management methodologies, including Agile and Scrum.

TECHNICAL SKILLS

Azure DevOps Terraform Microsoft Azure CI/CD Pipelines Git Docker Kubernetes YAML Bash Scripting SonarQube
python c,c++ HTML,CSS,JAVA Linux

WORK EXPERIENCE

Senior Azure Data Engineer with client AWS

TURING ENTERPRISES, INC (Remote) (Jul 2025 - Present)

Develop and maintain Infrastructure as Code (IaC) using CDK for Terraform (CDKTF) with Python.
Design reusable Python classes and constructs for Terraform resources and modules.
Manage infrastructure lifecycle, state, and deployments via Terraform CLI and Terraform Cloud.
Utilize Python virtual environments (venv/virtualenv) and manage dependencies using pip.
Automate infrastructure provisioning, validation, and testing with Python scripts.
Debug, validate, and ensure quality of infrastructure code.
Collaborate with cross-functional teams to deliver scalable, maintainable cloud infrastructure.
Maintain clear documentation for infrastructure components and deployment processes.

Designed and implemented robust Infrastructure as Code (IaC) solutions for AWS using Terraform HCL, covering VPCs, EC2 instances, Auto Scaling Groups, RDS databases (PostgreSQL/MySQL), and IAM roles. Developed and maintained 15+ reusable Terraform modules, simplifying complex infrastructure patterns into modular, version-controlled components, reducing new environment provisioning time by 40%. Ensured cross-environment consistency and reliability across development, staging, and production by adhering to Terraform best practices, enforcing standardized HCL coding structures, and promoting maintainable, scalable, and secure AWS infrastructure deployments.

Achievements:

Spearheaded accelerated infrastructure provisioning by developing modular CDKTF Python constructs, reducing AWS environment deployment time by up to 50% across Development, Staging, and Production. Automated the creation of multiple project environments—including VPCs, EC2 fleets, and RDS databases—cutting manual configuration efforts by 60%. Designed 15+ reusable Python classes for common AWS patterns, improving code consistency, maintainability, and adoption across multiple engineering teams, enhancing the overall efficiency of infrastructure-as-code practices.

Internship

CoreXtech Pvt Ltd (Pune) (Jun 2025 - Aug 2025)

- Engineered and deployed CI/CD pipelines using AWS CodePipeline and CodeBuild, seamlessly integrating Git (GitHub/GitLab) for automated application deployments across diverse environments.
- Developed and implemented Infrastructure as Code (IaC) leveraging Terraform to provision AWS resources (EC2, S3, RDS, VPC, IAM, etc.), ensuring consistent, repeatable, and scalable provisioning.
- Integrated SonarQube into CI/CD workflows, automating static code analysis to proactively identify code quality issues early in the development cycle.
- Implemented Checkov for policy-as-code scanning to enforce compliance with AWS security and operational best practices during infrastructure deployment.
- Employed Trivy to scan container images (stored in Amazon ECR) for vulnerabilities, guaranteeing secure and compliant container deployments within the CI/CD pipeline.
- Managed Git repositories with well-defined branching strategies and pull request workflows, fostering effective team collaboration and code review processes.

Achievements:

- Improved application deployment frequency by automating application deployments to AWS Elastic Beanstalk, ECS, and EC2 instances.

- Enhanced pipeline performance by employing tools like CloudWatch and X-Ray to identify bottlenecks and implement targeted improvements.
- Successfully fostered seamless integration and delivery by working closely with development, QA, and operations teams, promoting a DevOps culture focused on continuous improvement and automation.

Sr. Engineer

Workboat Media Pvt Ltd (Varanasi) (Nov 2019 - Jul 2025)

Key Responsibilities:

- Deployed and managed cloud servers on Microsoft Azure, including VM provisioning, storage, and network configurations.
- Configured Linux and Windows servers for high availability, security, and scalability.
- Implemented auto-scaling, load balancing, and custom images for application hosting.
- Set up SSH key-based access, NSGs, and firewall rules to secure cloud environments.
- Automated server setup and backup using scripts (Bash/PowerShell) and cron jobs.
- Monitored performance and cost using Azure Monitor, Log Analytics, and Azure Advisor.
- Integrated backup strategies using Amazon S3 and scheduled snapshot automation.
- Supported production workloads for healthcare and e-learning applications.

Work done

- Spearheaded the design and implementation of robust CI/CD pipelines utilizing Azure DevOps, integrating Git for streamlined code deployment workflows.
- Developed and deployed Infrastructure as Code (IaC) solutions with Terraform, enabling consistent and scalable provisioning of Azure resources across multiple environments.
- Integrated SonarQube into CI/CD workflows to enhance code quality by automating static code analysis and ensuring adherence to coding standards.
- Implemented Checkov for policy-as-code scanning, ensuring compliance with security and operational policies in infrastructure deployments.
- Employed Trivy for container image scanning during CI/CD pipeline executions, detecting vulnerabilities and ensuring secure container deployments.
- Managed Git repositories, establishing branching strategies and implementing pull request workflows to facilitate collaborative development.

Achievements:

- Accelerated release cycles and reduced manual intervention through efficient CI/CD practices and automated deployment processes.
- Enhanced deployment efficiency by monitoring and optimizing pipeline performance, identifying bottlenecks, and implementing strategic improvements.
- Cultivated a culture of continuous improvement by providing DevOps expertise to support development, testing, and operations, fostering stronger collaboration across functional teams.

Website Developer & Mentor

Gyantech International Pvt Ltd (Varanasi) (Jan 2014 - Dec 2019)

Responsibility

- Developed and maintained dynamic, database-driven websites using PHP, CodeIgniter, MySQL, HTML, CSS, and JavaScript.
- Designed responsive UI/UX layouts for educational and healthcare client portals.
- Built custom CMS and admin panels for client-side content control and updates.
- Trained and mentored junior developers and students on web development, PHP, and hosting.
- Deployed web applications on Linux servers, managing domains, DNS, and email configuration.
- Performed bug fixing, testing, and optimization to enhance performance and security.

Work done

- Developed and maintained dynamic websites using PHP, HTML, CSS, JavaScript, and Python, ensuring responsive and user-friendly interfaces.
- Designed website interfaces to meet specific client requirements across education and training domains, enhancing user experience and accessibility.
- Provided mentorship to junior developers and interns, offering guidance in web development, version control, and best practice project methodologies.
- Collaborated with cross-functional teams to gather client requirements, plan project sprints, and ensure timely project delivery adhering to client and organizational goals.
- Implemented SEO practices, optimizing website for better user experience and search-engine ranking.

Achievements:

Achievements

- Awarded Best Project Contributor for delivering high-quality client websites on time.
- Led a team of interns and helped transform Gyantech from a training center into a software development company.
- Successfully reduced project delivery time by 30% through reusable template and module development.
- Recognized for delivering SEO-optimized and mobile-friendly websites that improved client traffic and engagement.

Linux server administration

Nettech Pvt Ltd - BITS Pilani Goa Campus (Jul 2011 - Aug 2011)

Training Focus:

- Hands-on training in Linux server administration, network services, and infrastructure setup.
- Real-world implementation of network protocols, configurations, and security practices.

Key Topics Covered:

- Linux system installation and shell environment
- IP addressing, subnetting, and network planning
- Configuration of network services:
- DNS, FTP, Telnet, Samba, SSH, SMTP, Webmail
- Firewall and iptables setup for traffic control
- User and permission management

- Basic scripting for automation (Bash)

Achievements:

Skills Gained

- Practical experience with Red Hat Enterprise Linux (RHEL)
- Knowledge of client-server architecture and Linux networking
- Ability to configure, test, and secure common network services
- Troubleshooting network connectivity and service issues
- Building and maintaining a secure departmental server environment

EDUCATION

BCA (2013)

Sabarmati University, Ahmedabad

12th Math's (2008)

UP Board

10th science (2006)

UP Board

CERTIFICATIONS

- **AI Dashboards using Microsoft Power BI** (Skill Nation by Jatan shah - 2024)
- **Network security and Managment** (Nettech - 2011)

PROJECTS

Peer-to-Peer Network

Project: Designed and simulated a P2P file-sharing system using socket programming.

Server, DNS, and Network Configuration

Configured Linux servers, DNS, FTP, and firewall during summer training.

SKILLS

Core Competencies: Cloud Infrastructure Management, Automation & Orchestration, Security Implementation, Continuous Integration/Continuous Delivery (CI/CD), Infrastructure as Code (IaC)

Soft Skills: Collaboration, Communication, Problem-solving, Adaptability, Mentoring

LANGUAGES

English, Hindi

PROFESSIONAL
